

DOMESTIC BOLT-ON IMMERSION ELEMENTS**WARRANTY CONDITIONS**

- Grimwood Heating Domestic Bolt-On Immersion Elements are designed to operate in conjunction with Sacrificial Anodes.
- We do not warrant the life of Grimwood Heating Domestic Bolt-On Immersion Elements in installations where water conditions exceed the below levels:

<i>Total dissolved solids</i>	<i>600 mg/litre or p.p.m.</i>
<i>Electrical conductivity</i>	<i>850 uS/cm</i>
<i>Total hardness</i>	<i>200 mg/litre or p.p.m.</i>
<i>Chloride</i>	<i>250 mg/litre or p.p.m.</i>
<i>Magnesium</i>	<i>10 mg/litre or p.p.m.</i>
<i>Sodium</i>	<i>150 mg/litre or p.p.m.</i>
<i>pH</i>	<i>Min 6.5 and Max 8.5</i>

- To maintain the protection of your Grimwood Warranty it is essential that where an anode is fitted it is inspected on an annual basis. If you are unable to demonstrate this has been done, your Warranty may not be valid.
- A full range of replacement anodes is available from your Grimwood stockist.

See Catalogue section 8-5 for the full range.
